Division of Information of Technology Strategic Plan Addendum

Adopted July 20, 2022

Background

On February 9, 2022, the University of Maryland (UMD) issued, *Fearlessly Forward: In Pursuit of Excellence and Impact for the Public Good, The University Of Maryland Strategic Plan*. In response to the issuance of the university's new plan, the Division of Information Technology's (DIT) Strategic Plan Champions reviewed the university's strategic plan to assess its alignment with DIT's existing strategic plan, which was published in 2019. Upon completion of the assessment, DIT's senior leadership met with the Champions to discuss the results of this review, and from this discussion came new actions that DIT intends to complete to align with the university's strategic plan.

This 2022 Addendum to the DIT 2019-2024 Strategic Plan is an outcome of the assessment and meeting. It reflects new planned actions that DIT will complete in support of the university's strategic plan. DIT's original plan and this addendum constitute the division's complete plan.

Additions

Planned Actions

The following new planned actions (see "What are our specific planned actions?" in the original document) that DIT will complete as part of the Strategic Plan are as follows:

Initiative 2 - Enhance Research Technology Systems and Services
<u>Planned Action</u>: DIT will establish a team to provide technology consultations for proposal development in response to the Grand Challenges Grants program.

Initiative 4 - Foster Partnerships and Collaboration
<u>Planned Action</u>: DIT senior leadership and others in DIT will promote and appear on national stages to share our innovations with academic technology and analytics.

Initiative 5 - Develop and Empower Our Talent
<u>Planned Action</u>: DIT will provide staff members with educational and growth opportunities related to diversity, equity, and inclusion.
